B 000	INITIAL COMMENTS An unannounced Complaint (follow up) was conducted by Federal consulting surveyors from June 3 through June 5, 2019. The census at the time of this survey was 65 patients; and the active sample was eight (8) patients.	B 000		
B 103	SPEC MEDICAL RECORD REQS FOR PSYCH HOSPITALS CFR(s): 482.61 The medical records maintained by a psychiatric hospital must permit determination of the degree and intensity of the treatment provided to individuals who are furnished services in the institution. This Condition is not met as evidenced by: Based on observation, interview and document review, the facility failed to: Provide active treatment, including alternative interventions of sufficient intensity and duration for four (4) of eight (8) active sample patients (A1, A2, A5 and A6). These patients were either not emotionally stable to participate in treatment or were not motivated to attend groups they were expected to attend, as listed on the unit activity schedule. Although the Master Treatment Plans (MTPs) for these patients included several group therapies, these patients regularly and repeatedly did not attend the designated groups. A patient's nonparticipation in assigned treatment modalities negates the clinical effectiveness of the patient's treatment goals and objectives, potentially delaying the patient's improvement. (Refer to B125)	B 103		
B 121	TREATMENT PLAN CFR(s): 482.61(c)(1)(ii)	B 121

TITLE

(X6) DATE

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

B103 Plan of Correction for Each specific deficiency Cited:

- The Hospital failed to determine the degree and intensity of the treatment provided to individuals who are furnished services in the institution.

Procedure/process for implementing the plan of correction:

- The Director of Clinical Services and Chief Nursing Officer have updated the initial treatment plan done by nursing staff within the first eight hours of treatment. This update will include, but not limited to, date of admission, legal status, anticipated length of stay, psychiatric reason for admission, medical problems, patient precautions, strengths, stressors/limitations, patient's appropriateness for group programming and alternative interventions if patient is unable to program in a group setting, and preliminary discharge plans.
- The Director of Clinical Services educated and re-trained clinical services staff the week of July 15, 2019, on the reviewing on the initial treatment plan completed by nursing staff and how this document informs their ongoing care with patients and the individualization of patient needs.
- The Chief Nursing Officer educated and retrained all nursing staff the week of July 15, 2019, on the completion of the initial treatment plan. This education included, but was not limited to, how the information obtained during the initial nursing assessment, collateral documentation/information, outside records, admission assessment, and patient reports all assist in the development of the initial treatment plan. Based on the information the nurse obtains through these varying tools, the nurse will identify the therapeutic interventions that will be provided based on the specific needs of the patient.
- The education provided to both the therapist and nurses will be part of the orientation and the annual training process.

Monitoring and Tracking procedures to ensure the plan of correction is effective:

- Program Directors, Nurse Managers, Director of Clinical Services, and Interim Chief Nursing Officer will randomly audit 20 percent of active patient charts weekly to ensure the degree and intensity of the treatment being provided will be assessed accordingly and incorporated appropriately into the treatment plan.

Process improvement: Address process improvement and demonstrate how the facility has incorporated improvement actions into its Quality Assessment and Performance Improvement (QAPI) program. Address improvement in systems to prevent the likelihood of re-occurrence of the deficient practice:

- Program directors, Interim Chief Nursing Officer, or Director of Clinical Services will aggregate and analyze via the created checklist for their reports on the weekly basis.
- Non-compliance will be addressed via re-education.
- Monthly reports of the weekly data will be aggregated, analyzed, and presented in the PI committee and reported via the 2019 Performance Improvement Dashboard.

Individual Responsible:

Director of Clinical Services

Date Completed:

7/19/2019

B121 Plan of Correction for Each specific deficiency Cited:

- The Hospital failed to provide a written plan that included measurable patient centered short term and long-range goals.

Procedure/process for implementing the plan of correction:

- The Director of Clinical Services & Chief Nursing Officer have educated and re-trained clinical services staff and nursing staff on the completion of individualized treatment plans that are based on measurable patient goals. This training included, but was not limited to, the creation of individualized long- and short-term treatment plan goals and objectives based on the patient's identified strengths, limitations and problem statements, the difference between long and short term goals, and ensuring that these are the goals of the patient and not staff. Staff were also educated on the use of SMART goals (Specific, Measurable, Achievable, Relevant and Time-bound).
- The Director of Clinical Services & Interim Chief Nursing Officer have educated and re-trained current staff to those roles on the week of July 15, 2019.
- This education will be part of the orientation and the annual training process for nursing and clinical services staff.

Monitoring and Tracking procedures to ensure the plan of correction is effective:

- Program Directors, Nurse Managers, Director of Clinical Services, and Chief Nursing Officer will randomly audit 20 percent of active patient charts weekly to ensure that all treatment plans have short term and long-range goals that are patient centered.

Process improvement: Address process improvement and demonstrate how the facility has incorporated improvement actions into its Quality Assessment and Performance Improvement (QAPI) program. Address improvement in systems to prevent the likelihood of re-occurrence of the deficient practice:

- Program Directors, Chief Nursing Officer, or Director of Clinical Services will aggregate and analyze via the created checklist for their reports on the weekly basis.

Date Completed:

7/19/2019

B122 Plan of Correction for Each specific deficiency Cited:

- The Hospital failed to provide a written plan that included specific treatment modalities utilized and active treatment interventions based on presenting psychiatric symptoms resulting in hospitalization.

Procedure/process for implementing the plan of correction:

- The Director of Clinical Services and Chief Nursing Officer have updated the treatment plans that require physicians, nursing staff, and program therapists to contain individualized active treatment interventions to address specific psychiatric treatment needs of patient. This update will include, but not limited to, the patient's problem/reason for psychiatric admission, the evidence and symptomology of the identified problem, short term goal/outcome, long term goal, intervention, frequency of the intervention, discipline responsible, start date of intervention, target date of intervention, and completion date of intervention.
- The Director of Clinical Services and Interim Chief Nursing Officer have educated and re-trained clinical services and nursing staff the week of July 15, 2019, on the completion of the treatment plans. This education included, but was not limited to, the development of the treatment plans based on assessments completed, collateral information obtained, outside records, patient's capabilities, and patient's progress in treatment. This training also included education about patient's presenting psychiatric symptoms that resulted in hospitalization. Staff were also educated on the use of patient's SMART goals to inform treatment interventions.
- The education provided to both the therapist and nurses will be part of the annual training process.

Monitoring and Tracking procedures to ensure the plan of correction is effective:

- Program Directors, Nurse Managers, Director of Clinical Services, and Chief Nursing Officer will randomly audit 20 percent of active patient charts weekly to ensure that all treatment plans include specific treatment modalities.

Process improvement: Address process improvement and demonstrate how the facility has incorporated improvement actions into its Quality Assessment and Performance Improvement (QAPI) program. Address improvement in systems to prevent the likelihood of re-occurrence of the deficient practice:

- Program Directors, Chief Nursing Officer, or Director of Clinical Services will aggregate and analyze via the created checklist for their reports on the weekly basis.

B0148 Plan of Correction for Each specific deficiency Cited:

- The Hospital failed to ensure that treatment plans contain nursing interventions that are more than generic and routine nursing functions and ensure Master Treatment Plans contain individualized nursing interventions to address specific psychiatric treatment needs.

Procedure/process for implementing the plan of correction:

- Nursing staff will receive training regarding formulation of patient specific treatment plans to include SMART goals & active interventions.

Monitoring and Tracking procedures to ensure the plan of correction is effective:

- CNO/designee will audit 16 charts weekly to ensure the treatment plan gives clear guidance for nursing staff to provider coordinated and individualized active treatment.
- Audits will continue until 100% compliance is achieved for 3 consecutive months. Then CNO/designee will audit 30 charts per month until the Governing Board recommends to discontinue or change audit with ongoing compliance. A new plan of correction will be developed for a compliance rate less than 80% for two consecutive months.

Process improvement: Address process improvement and demonstrate how the facility has incorporated improvement actions into its Quality Assessment and Performance Improvement (QAPI) program. Address improvement in systems to prevent the likelihood of re-occurrence of the deficient practice:

- Non-compliance will be addressed via re-education.
- Audit results will be reported bi-weekly to the Governing Board and monthly to the Performance Improvement Committee.
- Monthly reports of the weekly data will be aggregated, analyzed, and presented in the PI committee.

Individual Responsible:

Chief Nursing Officer
